

## CC-02 CAMERA LENS SELECTION CHART

	Horizontal Width of Target (in feet)			
2.9 mm	12.3	24.6	61.5	246
3.6 mm	9.2	18.4	45.7	184
4.3 mm	6.1	12.2	30.5	122
<b>6.0 mm</b>	3.8	7.6	<b>19.0</b>	76
8.0 mm	2.9	4.8	14.5	58
12.0 mm	1.9	3.8	9.5	38
16.0 mm	1.4	2.8	7.0	28

To determine the approximate vertical distance  
multiply the width by 0.75

To select the correct lens, first determine:

1. the distance from the camera to the target
2. the width of the target

### Example

1. the camera **MUST** be mounted 25 feet from the target and the target is 17 Feet wide, then the closest lens is a 6.0 mm
2. If it is possible to locate the camera 2 or 3 feet closer, then the image will be very close to the 17 foot target.
